

FIVE YEAR CAPITAL
IMPROVEMENT PLAN

2012-2016

Approved mm-dd-yyyy

City of St. Francis Capital Improvement Plan 2012-2016

The Capital Improvement Plan (CIP) is a schedule of proposed public projects and purchases over a five-year period. Capital improvements are projects, which require acquisition, construction, or replacement of various equipment or facilities, including public buildings, infrastructure, utilities and parks.

The purpose of the CIP is to a) identify capital expenditures which are anticipated to be requested over a five-year period; b) determine a source of funding for the requests; and c) provide an opportunity for long term planning.

The plan is not intended to provide for precise budgeting. Capital costs are projected as estimates. Upon each update of the plan, deletions, additions, delays, or other revisions may occur, reflecting changing community needs. These changes allow for budget refinements as a particular project nears actual construction.

Approval of the CIP by City Council does not authorize spending or initiation of a given project. The plan is a planning and financial tool which not only tells the viewer where things are going but also facilitates negotiation and decision making for community development.

The 2012-2016 CIP presents an excellent combination of maintenance and expansion projects. By proceeding with these scheduled improvements, the City Council can be assured that the infrastructure needs of the citizens are receiving the necessary level of attention.

HIGHLIGHTS OF THE CAPITAL IMPROVEMENT PLAN

The five-year total expenditures within the 2012-2016 CIP are \$49,692,874. Changes by project category over the last CIP are as follows:

	2010-2014 CIP	2011-2015 CIP	Increase (Decrease)	
			Amount	Percent
Buildings	\$8,274,580	\$8,609,630	\$335,050	4.0%
Computers	-	-	-	0.0%
Equipment	1,030,500	1,017,000	(13,500)	-1.3%
Land	-	-	-	0.0%
Parks	2,617,000	2,695,510	78,510	3.0%
Streets	14,941,000	15,389,230	448,230	3.0%
Trails	310,000	310,000	-	0.0%
Utilities	16,047,000	20,168,414	4,121,414	25.7%
Vehicles	1,113,840	1,503,090	389,250	34.9%
TOTALS	\$44,333,920	\$49,692,874	\$5,358,954	12.1%

The five largest projects within the CIP are as follows:

1. East Side Wastewater Treatment Facility - \$16,000,000
Construction of this project is planned for 2015. It will be used to serve our growing population and industrial users. Timing of the facility will be dependent upon population growth.
2. Public Works/Police Facility - \$9,200,000
Construction of this project is planned for 2012. The new building will house staff and equipment. Costs will be divided between the Streets and Parks Departments and the Water and Wastewater Departments and Police Department.
3. Bridge Street Traffic Improvements - \$3,820,270
Construction of this project is planned for 2015. New backage road from Poppy St. to County Road 9, signalized intersection in conjunction with county improvements at Bridge St. and Co. Rd. 9, and reconstruction of Poppy St. from 227th Avenue to Bridge St. is planned to improve safety, traffic and economic development.
4. Trunk Hwy 47 Water & Sewer Extension - \$3,785,974
Construction of this project is planned for 2013. Extension of water and sewer service North on Hwy 47 to 245th and West on 241st Avenue to Roanoke. Majority of the costs to be covered by trunk area assessments.
5. 241st Avenue - \$3,320,720
Construction of this project is planned for 2014. Reconstruction of the street to curb and gutter with utilities is planned to improve safety and traffic.

MAJOR FUNDING SOURCES

Assessments – funding from charges made to property owners who benefit from public improvements. The City would most likely issue bonds for the improvements and pay off the bonds with the bi-annual special assessment payments collected by the County.

Capital Improvement Plan Bonds – CIP General Obligation bonds are backed by the full faith, credit, and taxing powers of the City of St. Francis and may only be used to finance public projects such as city halls, public safety facilities and public works facilities. Specific criteria must be met before issuing this type of bond – see MN Statute 475.521.

Capital Outlay Fund – this fund was established to finance major capital outlay expenditures that cannot easily be financed by alternative revenue sources. Money is transferred to this fund and designated for specific future expenditures.

County Funding – this is used to identify that portion of public works improvement costs that are paid for by Anoka County. When county property within the city is improved, the cost of the improvements is jointly financed by the two governments.

General Fund – this fund accounts for all financial resources except those required to be accounted for in another fund. The fund accounts for the majority of the city's operating budget.

General Obligation Improvement Bonds – G.O. bonds are backed by the full faith, credit, and taxing powers of the City of St. Francis. These bonds represent the portion of public improvement project costs that are not assessed. At least 20% of the project cost must be assessed to issue these bonds.

Grants – it is anticipated that the City will receive grant funding to complete some of its projects. If the grant money is not obtained, the project will be put on hold until other financing sources can be found.

Lease Purchase Revenue Bonds – the City has the authority pursuant to Minnesota Statutes, Section 465.71 to construct facilities pursuant to a lease with option to purchase agreement. The City must have the right to terminate the lease purchase agreement at the end of any fiscal year during its term. Unless terminated at the end of any fiscal year the lease is payable from any revenues available to the City. Under current law, if the City wants the ability to levy taxes outside of levy limits to make the lease payments the bonds must be issued by the Economic Development Authority (EDA).

Liquor Store Fund – this fund accounts for profits derived from the sale of alcohol, cigarettes and other miscellaneous items. Profits are used to help keep city property taxes down and fund special projects.

MSA State Aid – this refers to money received from the state for street construction projects. State aid allotments for street construction are based on two factors: population and fiscal need. Fiscal need is determined by the estimated costs of construction and maintenance of the city's state aid streets over 25 years.

Park Development Fund – this fund mainly accounts for the receipt and disbursement of park availability charges. These charges are levied against all new buildings constructed and are paid when the building permit is issued.

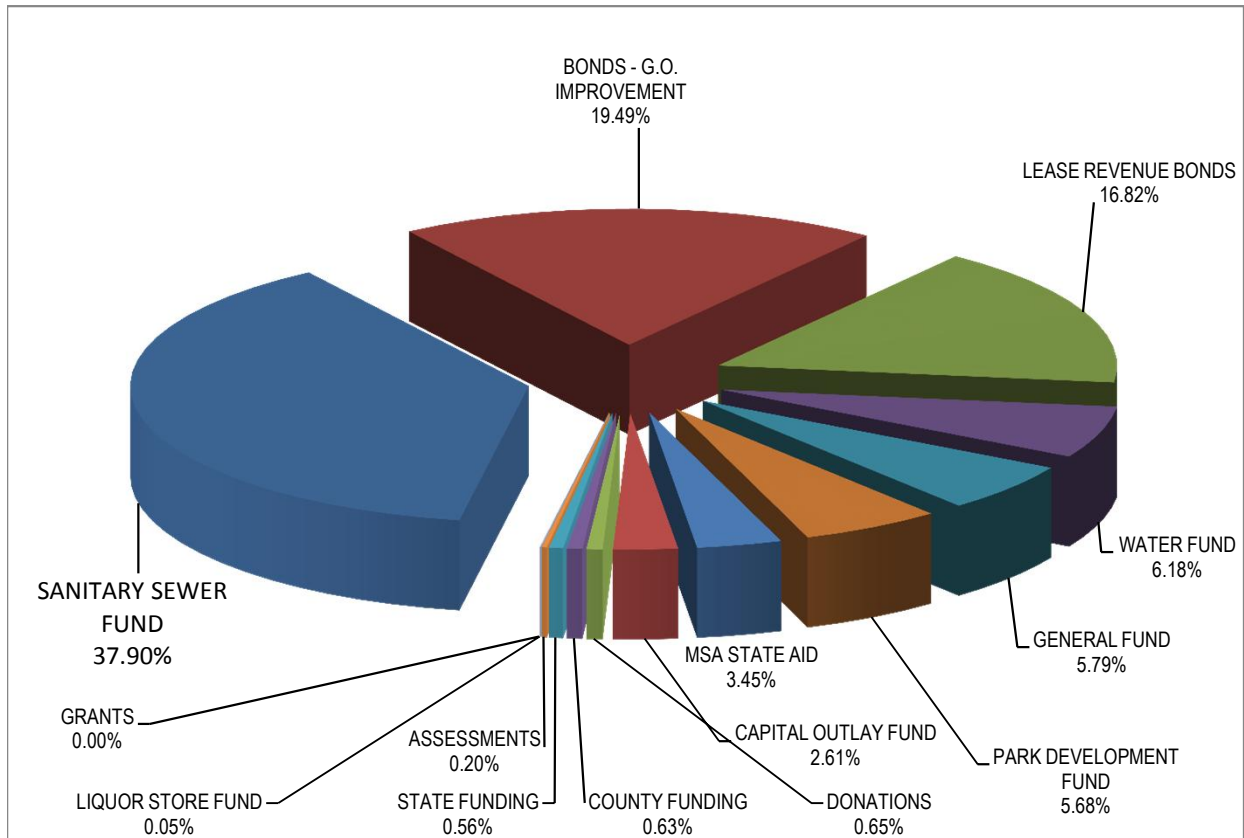

Sanitary Sewer Fund – this fund accounts for customer sanitary sewer service charges that are used to finance the sanitary sewer system operating expenses.

State Funding – this is used to identify that portion of improvement costs that are paid by the State of Minnesota.

Water Fund – this fund accounts for customer water service charges that are used to finance the water system operating expenses.

FIVE-YEAR CAPITAL IMPROVEMENT PLAN PROJECTS FUNDING SOURCES

SANITARY SEWER FUND	\$20,046,145

DESCRIPTION brief statement with primary focus of purchase or construction
 City car to run errands to the bank, post office, Anoka County and various meetings.
 Replace Ford Crown Victoria.

JUSTIFICATION new/replace, safety, efficiency, usage demand, etc.
 This vehicle would be used by city staff to help eliminate mileage reimbursements for meetings, bank and post office runs and other errands. This would replace the old police vehicle currently being used.

DESCRIPTION

brief statement with primary focus of purchase or construction

Replace Tanker 1 (1990 Chevy) and pumper truck (1993 Spartan).

JUSTIFICATION

new/replace, safety, efficiency, usage demand, etc.

Requesting replacement of Tanker 1 and Engine 1 with one new dual duty truck. Tanker would be transferred to city maintenance for their needs and going from two trucks down to one would free up some parking space and reduce maintenance costs.

DESCRIPTION

brief statement with primary focus of purchase or construction

Purchase bandsaw.

JUSTIFICATION

new/replace, safety, efficiency, usage demand, etc.

New bandsaw will improve safety and efficiency. At present, metal chopsaw is used for metal fabrication projects. However, it's noisy, slow, has limited ability to make wide cuts and compound angles and throws lots of metal particals into the air.

DESCRIPTION

brief statement with primary focus of purchase or construction

Routine replacement of Ford f-350 diesel pickup and plow.

JUSTIFICATION

new/replace, safety, efficiency, usage demand, etc.

This would replace a 10 year old truck. We will continue to use this vehicle for day to day operations

DESCRIPTION brief statement with primary focus of purchase or construction
 Replace sanitary and storm sewer, water main and hydrants, curb, gutter, and street.

JUSTIFICATION new/replace, safety, efficiency, usage demand, etc.
 Streets have flooding issues due to inadequate storm sewers. There is also a concern that the water main may be of poor quality. Buried equipment has shown signs of major deterioration.

DESCRIPTION

brief statement with primary focus of purchase or construction

This piece of equipment is vital for our ball field maintenance and parks and grounds care. This would replace our mule and ranger

JUSTIFICATION

new/replace, safety, efficiency, usage demand, etc.

This is used for dragging/grooming our infields on our ball fields, maintenance within our parks so that we do not tear up the turf, maintenance of our skating rinks, and snow removal on our trails. We would use this to clear around hydrants and for spraying weed @ our ponds This would add to our efficiency and effectiveness because we can use all of our current attachments on this unit.

DESCRIPTION brief statement with primary focus of purchase or construction
 Change out aging water meters (200 meters per year).

JUSTIFICATION new/replace, safety, efficiency, usage demand, etc.
 With new plant running we can effectively start changing our our older water meters that have lost efficiency due to poor water quality passing through them. At the same time we would start switching over to an automatic meter reading system. This will eliminate to costs associated with manually reading meters and give us real time data. This would be a 7 year plan.
